Subject: Dimock - Glycol and Ethylene Glycol Samples

Rupert,

There has been a little confusion regarding when and where to ship the glycol and ethylene glycol samples. Based upon our discussion, we will plan to ship the ethylene glycol samples in-house to Pace tonight. After this shipment, we will no longer send ethylene glycol samples to Pace.

We have approximately 20 glycol samples in-house, plus the samples that were collected today. We will ship these to Test America.

As we discussed, we will continue to collect sample volume for ethylene glycols. We are working on increasing the capacity of Test America to analyze these samples.

Please verify that this information is accurate.

Thanks,
Suddha Graves
